## Introduction of the study

The skills or knowledge required to do a particular job is developed in the human being with the help of training only. The trained employee is an asset to the organization and the employer. The training is valuable to employee because it increases his efficiency & he gets greater opportunity for advancement through promotion. The development includes the improvement in the technical knowledge and skills, ability to solve problems etc.

## Objectives of the Study

The report studies the different departments of **Shree Prabhulingeshwar Sugars and Chemicals Limited** and the functioning of each department.

Hence the objective of this study is: -

1. To see the impact of Training & Development in the organization
2. To know how the training & development programme by improve efficiently of the employees.
3. To identify the training and development needs given to Employees.
4. To identify the methods of training and effectiveness of training.
5. To know whether Training has been provided at right point of time

## Limitations of the Study

1. The information is based only on the sample selected for the study and not on the entire population.
2. Some employees were unwilling to reveal their opinions on certain issues.
3. Top managers did not share confidential data due to management policies.
4. The researcher could not contact and collect data from employees working in night shifts.

# Organisation structure :

**Training**

Efforts were initiated by the organization to foster learning among its members and that tends to be narrowly focused and oriented towards short-term performance.

**Development**

Efforts that are oriented towards broadening of individual skills for handling future responsibilities.

**Definition of Training**

**"It is a learning process that involves the acquisition of knowledge, sharpening of skills, concepts and rules or changing of attitudes and behaviours to enhance the performance of employees."**

**Key Points**

- Training is an activity which leads to improved skills and behaviours.
- It's not what you want in life, but it's knowing how to reach it.
- It's not where you want to go, but it's knowing how to get there.
- It's not how high you want to rise, but it's knowing how to take off.
- It may not be quite the outcome you were aiming for, but it will be an outcome.
- It's not what you dream of doing, but it's having the knowledge to do it.
- It's not the goal you set, but it's what you need to achieve it.
- It's not a set of goals, but it's more like vision.

## Training Methods

**A) On-the-Job Methods**

**1) On-the-Job Training**

An employee is placed in a new job and is told how it is to be performed. It aims at developing skills and habits consistent with the existing practices of an organization and by orienting him to his immediate problems. A variety of

training aids and techniques are used such as procedure charts, lecture manuals, sample problems, demonstrations, oral and written explanations, etc.

**2) Vestibule Training or Training-Centre Training**

It involves classroom training imparted with the help of equipment and machines identical to those in use at the place of work. It is often used to train clerks, bank tellers, inspectors, machine operators, typists, etc.

**3) Simulation**

It is an extension of vestibule training. The trainee works in closely **duplicated real job conditions**.

**4) Demonstration and Examples**

Here the trainer describes and demonstrates how to do a certain work. He performs the activity himself, giving a step-by-step explanation of **why**, **how**, and **what** of what he is doing.

**5) Apprenticeship**

A major part of training time is spent on on-the-job productive work. Each apprentice is given a programme of assignments according to a predetermined schedule, which provides efficient training in trade skills. This method is appropriate for training in crafts, trades and technical areas.

**B) Off-the-Job or Classroom Methods**

The location of this training may be a company classroom, an outside place owned by the organization, an educational institution or association which is not part of the company.

These methods are:

**1) Lectures**

These are formally organized talks by an instructor on specific topics. This method is useful when philosophy, concepts, attitudes, theories and problem-solving have to be discussed.

### 2) The Conference Method

Under this method, a conference is held according to an organized plan. Mutual problems are discussed and participants pool their ideas and experience in attempting to arrive at better methods of dealing with these problems.

### 3) Seminar or Team Discussion

The group learns through discussion of a paper on a selected subject. The paper is written by one or more trainees. The material to be analyzed is distributed in advance in the form of required reading.

### Case Discussion

Under this method, a real or hypothetical business problem or situation demanding solution is presented to the group members. They are trained to identify the problems present, suggest various alternatives for tackling them, analyze each of these, find out their comparative suitability and decide for themselves the best solution.

### Role-Playing

This method is also called **role-reversal**, **socio-drama** or **psycho-drama**. Here trainees act out a given role as they would in a stage play. Two or more trainees are assigned roles in a given situation, which is explained to the group.

### Programmed Instruction

This involves two essential elements:

1. A step-by-step series of knowledge, each building upon what has gone before.
2. A mechanism for presenting the series and checking the trainee's knowledge.

# FINDINGS

Training is the basic requirement for every employee when they join any organization to get adjusted with the work and improve skills and techniques related to the assigned job. It is the responsibility of the company to provide training.

1. Majority of employees are satisfied with the training they receive.
2. Training courses are relevant to employees' needs.
3. Employees are getting training at the right time.
4. There is a system to approach higher authorities when training is needed.
5. Training helps build interpersonal relationships between superiors and subordinates.

# SUGGESTIONS

- The management should identify the training needs and they should prepare & design training program.
- The program schedule and the training policy should be displayed on the notice board.
- For designing training program trade union should be consulted.
- At the end of each training program opinion about the training programs should be taken from the participants.
- The trained employees should be given some sort of incentives.

# CONCLUSION

In this study, it has been analysed that many employees feel that the training program in the organization is in adequate. The training program not only helps employees become aware of their job but also helps them become more creative and proactive, leading to organizational development.

Training programs also help employees develop interpersonal and intrapersonal skills. Training should be provided to every employee by identifying needs scientifically and should always be proactive. Finally, the project helped in understanding the practical aspects of the corporate world. The project was completed with real-time learning experience
